

Woodpeckers®

PRECISION WOODWORKING TOOLS

Woodpeckers® Rule Stops

Take any rule; add a stop and repetitively accurate marks are at your finger tips. This approach is a tried and true marking method for woodworkers.

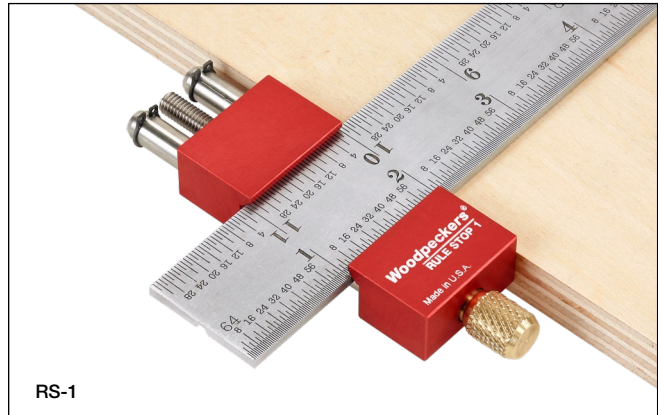

The Woodpeckers Rule Stop is made in two sizes, one inch and two inch. The smaller one inch rule stop (RS-1) is ideal for steel rules up to one inch wide. Commonly used with steel rules from combination squares.

The two inch rule stop (RS-2), is sized to fit rules up to 2 1/4" wide like Woodpeckers Woodworking Rules.

The screw and posts of both models are machined from stainless steel, the knob is brass and the body parts are aluminum.

Like all Woodpeckers Precision Woodworking Tools, these Rule Stops are made in the U.S.A.

RS-1

RS-2

		CAN	US
RS-1	1" Rule Stop.....	\$27.49	\$24.99
RS-2	2" Rule Stop.....	\$36.29	\$32.99

Woodpeckers® Woodworking Rules

What makes our new Woodworking Rule better than your average yardstick? They're straighter, heavier, sit flatter, are easier to handle and have both a standard and center scale.

The way the inch scale markings are engraved on a 30 degree bevel reduces parallax for faster, more accurate measuring and marking.

Mass produced general purpose rules lack the rigidity, accuracy and shape to better suit what furniture and cabinet makers need.

Woodpeckers Woodworking Rules have been engineered specifically for woodworking.

Available in 6", 12", 24" and 36" lengths.

Like all Woodpeckers Precision Woodworking Tools, our Woodworking Rules are made in the U.S.A.

		CAN	US
WWR6	Woodworking Rule 6".....	\$14.29	\$12.99
WWR12	Woodworking Rule 12".....	\$21.99	\$19.99
WWR24	Woodworking Rule 24".....	\$32.99	\$29.99
WWR36	Woodworking Rule 36".....	\$43.99	\$39.99

PRECISION WOODWORKING TOOLS

Woodpeckers® Straight Edge Rules

Whether it's your jointer, table saw or even a hand plane, getting single or multiple surfaces parallel and on the same plane can be a challenge.

New 2010
Product

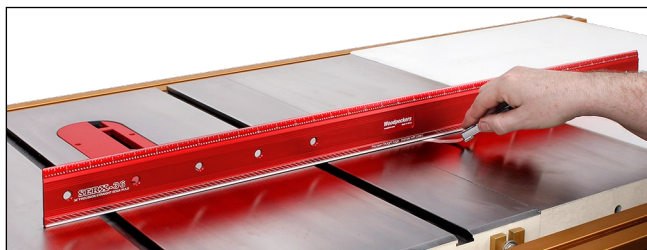

Woodpeckers new Straight Edge Rules make this job faster and easier.

Straightness is well within .001" per foot. The base edge has two legs for stability when upright. This edge also features a highlighted gauge line for easy sighting of surface inconsistencies. The opposite straight edge is formed at a 30° bevel and engraved with precise inch scale markings. The beveled design reduces parallax and increases measuring and marking accuracy.

Machined from aircraft grade aluminum and anodized for surface durability. Comes in a fitted wall mountable case.

Like all Woodpeckers Precision Woodworking Tools, made in the U.S.A.

SERXL-12	Straight Edge Rule 12"	\$21.99	\$19.99
SERXL-24	Straight Edge Rule 24"	\$43.99	\$39.99
SERXL-36	Straight Edge Rule 36"	\$65.99	\$59.99

Woodpeckers® Steel Straight Edges

Woodpeckers tool Steel Straight Edges offer the finest in straight edge accuracy and durability. A straightness accuracy of .0005" per foot is achieved through meticulous water cooled surface grinding.

The 28-32 Rc hardness contributes substantially to its durability and resistance to wear.

Handling is improved by two hand slot openings making it easier to maintain confident control and reduce the risk of a damaging drop.

This tool is perfect for precision set ups of long bed jointers, table saw extension wings, checking the flatness of tables and door panels and alignment of cabinet parts.

Each Woodpecker Steel Straight Edge comes fitted in a wall mountable case for safe and convenient storage.

Like all Woodpeckers Precision Woodworking Tools, made in the U.S.A.
