ENGLE ANGLE

O W N E R ' S M A N U A L

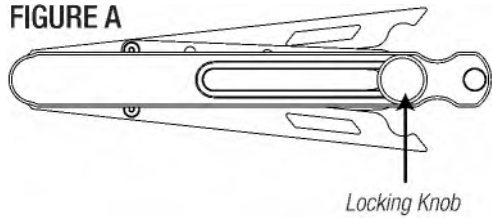

**Scan the QR code above
to watch the video
or visit woodpeck.com
under the video tab towards
the bottom of the product page.**

If you think you're missing anything, email us at mailroom@woodpeck.com.
You can also call us at 800-752-0725 from 9:00 a.m. to 4:00 p.m. EST Monday - Friday.

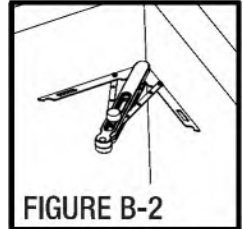

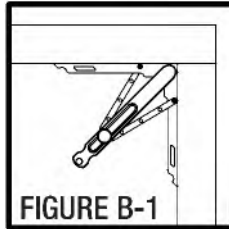

USING YOUR ENGLE ANGLE

1. Loosen the locking knob and adjust the arms of the Engle Angle to match the corner you're fitting. **FIGURE A & B**

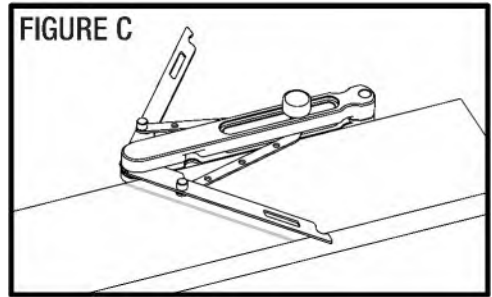

FIGURE A

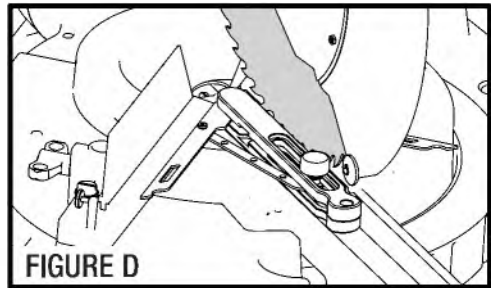

2. Tighten the locking knob and transfer the angle between the central body and one arm to your material. **FIGURE C**

3. If it is necessary to set the angle on your miter saw, rather than marking your material, disconnect one arm and move it out of the way.

4. Align the connected arm to the back fence of your miter saw. **FIGURE D**

5. Unplug your miter saw. Bring the blade down to just above the table and adjust the miter angle until the saw blade matches the body of the Engle Angle. Confirm the fit with a test cut.
