### **FIBONACCI GAUGE**

O W N E R ' S M A N U A L

**For thousands of years** builders, architects and artists have relied on a ratio of 1:1.618 to provide pleasing forms. Now you can do the same without ever touching a calculator.

If you think you're missing anything, email us at [mailroom@woodpeck.com](mailto:mailroom@woodpeck.com).  
You can also call us at 800-752-0725 from 9:00 a.m. to 4:00 p.m. EST Monday - Friday.

## THE GOLDEN RATIO

The Fibonacci Gauge provides the Golden Ratio two different ways.

1.  $BC = AB \times 1.618$
2.  $AC = BC \times 1.618$

Place two points at the beginning and end of any dimension and the spaces between the three legs will provide three pleasingly complementary dimensions.
